AI & Recruitment

How to stand out when the bots read first

> **"Use AI to help you express yourself better, not to pretend to be someone you're not."**

Bethany Laverriere
Director of Talent Acquisition, InGenius Prep

Missed it? Watch now
Full workshop on YouTube

Your new home is open.

- **Meet your people** near you
- **Get intros** to doctors, lawyers, finance pros
- **Find internships** on the Ask & Offer board
- **Local events** picked for you weekly

First name + last initial. No password.

6 RULES TO BEAT THE BOTS

01 — PDF it. Test it.
Upload a PDF, then paste it into plain text. Jumbled there? Jumbled for the bot.

02 — Show, don't tell.
Ditch "hard worker." Share one real, measurable win.

03 — Everything counts.
Babysitting, clubs, sports, side projects: it's all experience.

04 — Get found.
Recruiters search LinkedIn by keyword. Give them yours.

05 — AI drafts. You decide.
Brainstorm with AI, then fact-check it and make it sound like you.

06 — Slide into the DMs.
Bethany's latest hire messaged her before applying. It worked.

HEADLINE GLOW-UP

~~Student interested in art and design~~ → **Student designer | digital illustration, graphic design**

DID YOU KNOW? Amazon built an AI to score resumes. It learned old hiring bias, and they scrapped it in 2018. That's why humans still matter.
